I liked this book because it was one of the first romances I'd ever read and about three weeks before I picked it up randomly at a store, I had a dream that almost the exact same thing happened and I was like "Oh my god! I have to write a story about that!" so I wrote down the plotline and then I read this and was like fuck. Anyway, the story is interesting enough although I'm not big into Native American plotlines. Like the protagonists struggle with his background and his life. I mean, I'm Native American for heaven's sake and I was like \*get over it already, man!\* And I didn't enjoy the white woman/brown man plot because it's so overdone and boring. But, the secondary characters and the heroine's little quirks were amusing, so I give it three stars.

Dec'13/Jan'14 - re-read

July 2010- re-read

This was the book that got me reading again. A trip into town one weekend at the cottage led me to a used bookstore and to this book by fluke and I LOVED it. After a couple of years of not really reading much this hooked me right away and made me remember how much I love reading.

It's a typical cheesy romance, but the adventure makes it a really fun/suspenseful read. I recently found my copy and will be reading it again in the near future.

If I could give this book six stars, I would! It is fast-paced from the first page right up until the end! I stayed up way too late one night to read it. The characters are believable, the plot is well written and I loved it!

Nonstop action, standard romantic thriller

This book is just like another typical detective book written by female author. It ended up with romance between the FBI officer and the witness. A part from that, I really like the background of the FBI inspector. He is a half-blooded native American. He had a very bad past and was being an officer just to run from his

bad past. Usually in detective book, the police will be very very strong even though they had a very bad past. But, in this novel, we can spot the weaknesses of the officer directly. This make the two couple really balance in position. The witness, even though cannot do anything except playing piano, can feel the gap of the officer loneliness and emotional sadness. From this book, I also learn about how Native-Indian America behave and I know a bit about Navajo tribe too. :)

This a feel good crime/love story. I really enjoyed reading it.

Lauren Brownly, a concert pianist, witnesses a murder. She is put into protective custody. FBI agent, Sam Grey Wolf Rawlins (Wolf) is assigned to protect Ms. Brownly.

Great potential but didn't quite make it for me. It was good enough to make 3 stars though.
