Hold Hands In The Dark Katherine Pathak

How long would you wait to take revenge?

'Now,' Granny said quietly. 'We shall hold hands in the dark. Then we will know we aren't on our own.'

When Sergeant Sam Sharpe of the Virginia P.D. contacts Dani Bevan about the murder of one of his officers, the Glasgow DCI doesn't see how she can help.

But as Sam explains further, Dani finds herself entangled in a case which transports her team back to the murky world of the industrial conflicts of the 1970s.

Hold Hands in the Dark is the seventh novel in the DCI Dani Bevan series of police procedurals.

Rich Turner says

It was Wordsworth, of course, who produced "spots in time" which captured an image immortally. In poems like the "Solitary Reaper" you can see clearly the man working the fields. He portrayed the Lake district in northern England in a way that made it incredibly attractive. I once stayed in Ambleside, an experience I will treasure.

Katherine Pathak has this same ability. I've read all of her DCI Dani Bevan novels and they are tremendous. They are police procedural mysteries that are exciting, but are steeped in Scottish culture. After reading her novels I feel like moving to Garansay, an island off the Scottish coast that is the product of Pathak's imagination. She is a great writer whose books are on Kindle unlimited.

After I finished my first novel, Tommy Babcock, I hoped to construct a series which would take him through the second world war. I became disabled while finishing the book, and can no longer type on a computer. I dictate my blogs. But I get to find great authors such as Katherine Pathak and live through their writing. Her novels leave you guessing until the end. They involve good research. In this latest novel murders take place both in Scotland and America. The other aspect I admire about her writing is the willingness to let her main character have passion and other emotions that flesh and blood characters (not omnipotent sleuths) experience. Dani Bevan is a character you can respect, but you could also fall in love with. It might take you rocketing in space or see you crash land in Wales, but you wouldn't forget it.

David Ziegler says

Hold Hands in Dark novel

This is a winner in mystery elements and in the development of the characters in this police division and in the characters they meet and work with. Have read all the novels in this series to this point. :)

Susie Pyle says

DCI Dani Bevan series

DCI Bevin is young and dedicated to her job. The stories move along and are well worth the read. I wasn't sure when I finally finished the first one if I would keep going, but each book gets better. There are several times that the author moves the storyline in a new direction with little explanation. The romantic scenes sometimes detract from the story. Obviously the detective work kept me reading. The twists and turns often reveal how complex situations can turn explosive and the common failings we all share can damage others down through the years. I'm not sure about the ending of book seven, I suppose that I will need to read book eight to see how her character recovers.

Alan says

A great read. This series gets better and better. Thoroughly recommended.

Donna says

Great read

I really recommend reading these books if you are a fan of British crimes stories. The characters and stories are well written and fleshed out, and I really like the main characters as they progress in this series.

Mike says

Terrific series

I just finished reading the series. All seven books were terrific. Loved the characters and the stories. Dani is a jewel and her supporting cast are wonderfully human.

Nancy Brown says

1970s Union strikes and death then and now

I would recommend this book to all who enjoy a great WhoDunit. Katherine Pathak's book 7 is by far the best and saddest of endings when death comes for one of the characters I have come to enjoy in her books. Not going to spoil it, just going to have to read this. I highly recommend this whole series.

Lisa says

A good read.

I've enjoyed all the books in this series. Dani Bevan is a likeable and relatable character. The books are set in Scotland and Katherine Pathak manages to capture its beauty in the telling of the story.

If you like a who Scottish based, crime/detective book then you will enjoy this series.

Harry McClellan says

Hold Hands in The Dark

This book was great as usual, got to start my next book of the series. Happy reading ! !.

book of the

Tracey S Choat says

Enjoyed this series

Wow. Didn't expect that ending. I've read the whole series beginning with book one. They get better and better. Not excellent but very good. Loved the Scottish setting. Couldn't love the main character. Too fickle to have the DCI position. Worth reading, but begin with book one.
