Now THIS is epic! Absolutely everything I can say will be a spoiler, so I shall say nothing at all except that putting down this book is extremely difficult.

The twins are united and team up to fight the final battle that'll determine the future for all their friends and loved ones.

The entire series is an incredibly light read probably aimed for kids aged 10 and above. But adults can have as much fun with it, if this seems right up your street ;)

I'm almost sorry to see this series end. I liked the way it did, even though victory came at an enormous cost, and I think many of the characters showed their true colours.

I'd be interested to see more with these characters and how they evolved, but I really enjoyed this series. It was sad what happened to Takami, but I think it all ended the only way it could have done.

I was glad to see Kia finally able to let go of her rage and hate and allow herself to fall in love again. It was also good to see her and Ryushi reform their relationship, even though they're not as tightly bonded as they used to be.
