## Okavango: Beware the Ultimate Cure Fritz Damler

From South Africa comes a proven vaccine for TB. The CDC is planning a major inoculation program in Houston, L.A. and New Jersey.

The wonder drug seems on the up and up, until Freelance writer Terry Johns and wildlife photographer Liza Rittenauer innocently photograph two men and their airplane in a remote section of the Okavango Swamps. The photo sets in motion a tilt-a-whirl of violence and intrigue. While Liza lingers in a life-threatening coma, Terry, Liza's sister, Dawn, and the women's father, Cy, discover a sinister connection between the men in Liza's photograph, an underground lab in the Okavango, a leading pharmaceutical company in Johannesburg and a major HMO in Houston, Texas. And for Terry Johns, the truth becomes a nightmare.

## **From Reader Review Okavango: Beware the Ultimate Cure for online ebook**

### **Lawrence says**

Closer to 3 1/2 stars. Premise caught my interest. A vaccine with great promise in fighting TB in African trials is now being introduced in the U.S. but some Nazi era research has been used to introduce a contagion in the vaccine. When a couple of innocent bystanders are seen as loose ends, they slowly begin to piece together a frightening conspiracy. Found it an enjoyable way to pass the time at the beach and pool on vacation.

---

### **Barb says**

I enjoyed this book, especially liked the twists near the end.

---

### **Sandi Gillespie says**

#### **Good read**

It was a little slow starting but it was exciting enough to keep your interest motivated. The ending has a great twist with excitement through out the book

---

### **Michelle says**

#### **Good book**

You people should just read this book yourselves and write your own review on this novel yourself and I really enjoyed reading this book very much so. Shelley MA

### **Vykki says**

This book was a real thrill ride it sucked you in and it didn't let go. Tis The kind of book I love to read when the day is stormy.

---

### **Susan says**

"Okavango: Beware the Cure" can be considered a terror story! A newly developed vaccine for TB has proven to be a life saving medicine for many in Africa--especially for young children and millions of

children were given this vaccine. But there is something horribly wrong (intentional) with this vaccine.

Eight thousand doses are distributed in America, where undesirable side effects show up and are questioned. Too many educated, and smart people start asking questions.

The development of this vaccine had very far reaching, but planned results-- very horrible results.

Well developed characters and several great twists you won't see until they "slap you in the face (eyes!!).

Very good book for those that enjoy medical mysteries. 4 stars.

---

### **Patricia says**

World population growth and limited resources (water, food) are important issues. Through the centuries population growth was often slowed by war, plague and epidemics, and the vicious cycle of drought/crop failure/famine/starvation. Advances in agricultural practices -- better seeds, fertilizer, irrigation -- and the technology to ship surplus agricultural products around the globe have eased shortages of food in many places. How long before serious shortages occur?

Okavango reminds us that the world has not agreed on any long-term salutation to the problems facing humanity but Gemstok has -- is it visionary or diabolical?

Additional details will ruin this book and I don't want to spoil your fun.

No graphic sex or violence

### **Terralyn Brown Barfield says**

4 1/2 \*s!!!

Fritz Dalmer restores my faith in trying new (for me) authors. Can't wait to read more from this author who obviously values accurate medical/ scientific research as well as use of intelligent characters & good plot revolution. As I can count on 1 hand the # of 5 Star books I've ever read (& I read approx. 2-3 books per week), a 4 Star rating from me is high praise. Wish we could award 1/2 Stars here on Goodreads.
