Okay, I was a bit skeptical at first as I started reading this book. How does a six year old who leaps into a 27 year old's body act like an adult? But as I continued to read, I totally became engrossed in the story.

It was Butterfly Effect meets Jumper. Well, those are the two movies that come to mind. But this story was definitely more than that. I was the story of fate and a love that was meant to be no matter what.

I'd have to say this was a much better story than Ebner's Feather series. A must read!

Christina says

I absolutely loved this book. Sought of like the time traveler's wife but ten times better and I love a happy ending.
