Convoluted says

While I was a little thrown by the apparent jump 'back' in time into earlier in the series (going off Alec's age, though without many solid statements of that in the books it's not always clear how many years have passed) I really enjoyed the plot line of this one, and getting a feel for Alec's impetuous nature of younger years. The look into horses in the city was fun, and while it was a fairly straightforward and uncomplicated plot, it was a fun and easy read.

Rikki says

really liked this one

Jessica Timmons says

I enjoyed this book tremendously, steven has surely surpassed his father with the books he has written.

Caitlin Brown says

This is an exciting story carrying on the legacy of the black stallion. Good storyline and plenty of thrill for all horse fans. It is a little unrealistic however for one person (alec) to have done so many things in the horse business: jockey, breeder, harness racing, steeplechasing.

Kristen Coffin says

"People who love their horses are all alike. "

Likes: Loved Black Storm. Loved getting to see him. Loved the steeplechases. Way more than the harness racing book Walter Farley did. I jumped when I had my horse, so this was a little more relatable to me from that aspect.

Dislikes: Man, I've said it before, and luckily this is the last Black Stallion/Black Stallion Returns book so I won't have to say it again: HENRY IS A JERK. He is just such a crotchety old man that is too set in his ways to ever admit to being wrong or to ever have anything but Plan A. Need anyone remind him, that, without Alec and The Black he'd still be retired and hating his life?
